Product highlights

40 mm speaker driver
The 40 mm speaker driver is made of a composite mylar material for a highly sensitive yet powerful element that delivers sound without audible distortion.

Closed type design
Sounds around you are perfectly blocked out while the sound from the headphone is kept in a sealed chamber for perfect quality. This makes the headphones great for monitoring during live music or recording sessions.

Excellent sound quality
Acoustically-tuned design and high-quality drivers ensure best-in-class audio performance.

Neodymium magnet
Neodynium is the best material for producing a strong magnetic field for greater sensitivity in a voice coil, better bass response and higher overall sound quality.

24k Gold-plated plug
Rest assured that the precious metal gold finishing on the plug will give you a more reliable connection for better quality audio.

Ultra-lightweight design
The slim, lightweight stainless steel headband is so light you'll hardly notice you're wearing it.

Headband padding
The soft materials used for the headband cushion ensure comfortable prolonged use.

Comfort ear cushions
The special shape and luxurious materials used for the ear cushions ensure a perfect fit for maximum comfort. They prevent audio leakage and enhance bass performance too. The ear cushions are shaped in such a way that they perfectly align with the area around a person's ear.

Microphone friendly headphone
The cable length of this headphone is designed to optimize sound pick up from the microphone of your handsfree connector. It also optimizes overall cable length to the mobile phone.

Split cable
This standard cable has a 3.5mm socket on one end and a 3.5mm plug on the other for extending your freedom of movement with headphones.

Foldable for compactness
The headphone is designed to fold extremely small, so it fits in your pocket.
